Restriction Requirement

Restriction to one of the following inventions is required under 35 USC 121:

- I. Claims 1-8 and 13-17 drawn to a fluid (fuel) inlet tube classified in Class 60, subclass 739, and
- II. Claims 9-12 drawn to a method of supplying fuel classified in Class 60, subclass 776.

The inventions of Groups I and II above are distinct because the apparatus of Group I could be operated according to a method materially different than that of Group II. The apparatus of Group I is not limited to use with gas turbine fuel as required by the method of Group II -- the claimed apparatus could in fact be used in an alternative manner to supply fluids other than fuel.

Because these inventions are distinct for the reasons given above and require separate classification and/or divergent fields of search, restriction for examination purposes as indicated is proper.

Applicants are advised that even in the event that the restriction requirement is traversed, the response to this requirement to be complete must include an election of the invention to be examined. (The undersigned was unable to make contact with applicant's attorney for the purpose of offering the option of a telephone election, hence, this action is being made as a written restriction requirement.)
